Forestry “Lightning” Talks

World Forest Institute

-Showcasing Oregon Across the Globe-

China

Poland

Malaysia

Nicaragua

Taiwan

Nigeria

Spain

India

The challenges we face in forestry globally are surprisingly similar: increasing pressure on natural resources in a time of growing population needs. Meet 8 Fellows from around the world who came to Oregon to see how we meet these challenges. They hope to take what they’ve learned here to improve their communities back home. What we do in Oregon is inspiring people to impact their own corner of the planet.

Thursday, October 13 | 5:30-8:00 pm

Mt. Hood Room

World Forestry Center Discovery Museum

- Bringing back the rainforest to urban Malaysia
- How efficient are forest research organizations in China?
- Introduction of new species into Ireland’s biomass market
- Bamboo as a model for solving Nigeria’s housing crisis
- Innovative ways to grow forests in India’s cities
- What is the future of Poland’s state forests?
- Protecting Taiwan’s forests by climbing the tallest trees
- How to engage private forestland owners in Nicaragua

Appetizers and drinks on the house.

This event is Free!

Doors open @ 5:30 pm • Lightning talks @ 6:00 pm
